A. SPECIFIC TO THE PROPOSED DEPLOYMENT OF FUNDS AND INTERNAL RISK FACTORS

1. The Company does not have any tie-up / alliance with reputed major suppliers or customers, in absence of which the Company may not be able to generate continuous revenues.

MP

In a competitive environment tie ups are neither customary nor desirable for trading Company as the scenario keeps on changing. Company has generated goodwill and trust among its clients and is getting consistently repeat orders from most of its clients. As a matter of strategy the company has been diversifying and widening its export mix as well as continuously adding to its destinations and clients. The Company by not having any ties up / alliance, would be in a position to shift to new commodities/ clients/destinations within in short time and take advantage of an early entry.

2. The premises being, used by the Company, as it's, Registered Office is not owned by the Company. It is rented in the name of its group company, for which the Company is paying no rent to the owner instead an interest free security deposit has been placed with the associate company.

MP

Since Inception, Sakuma Exports has been conducting its activities at the said premises. The associate company has the tenancy rights including the right to allow the premises for use to any of its Group Companies. The Company is not paying any monthly rental or maintenance for the same. The Company has given to the group Company an interest free deposit of Rs.70 Lacs, which is refundable whenever the issuer vacates the premises.

3. **Declining Margins of the Company:** The net profit margins of the Company have shown a declining trend in the initial years of operation. It has reduced from 1.3% of sales in 2002 to 0.3% of sales in 2004

MP

During the initial years of its operations the Company's focus was on establishing product mix, client base, Goodwill. Now that the Company is well established with an enlarged client base and wide range of product mix, the margins have improved from 0.3% in 2004 to 0.85% in 2005 and further to 2.07% in the 5 months ending August, 2005 post tax.

4. **Dependence upon few customers:** For the year ended March, 2005, top ten customers of the Company constitute nearly 68% of its total export turnover. This could affect the operations of the Company in the long term as most of its sales are generated from few customers.

MP

The Company's relations with its top customers are strong and it is continuously getting repeat orders from them. Further the company, as a matter of strategy, has been working to enlarge its client base and product range. Today it has more than 75 clients. With increasing trend in sales and a deeper market structure evolving, the management expects the concentration levels to reduce further in coming periods. The dependence of the Company on few customers to generate sales has come down as top ten customers contribute 68% of the total export turnover in the year 2005 as against 100% in 2001.

5. **Seasonality of the products dealt in by the Company:** The Company is in the business of trading in many agricultural products, which are highly seasonal in nature. Thus, the earnings of the Company are subject to seasonal fluctuations

MP

As the Company is dealing in number of agricultural commodities, which have different seasons and with multiple cropping patterns in well irrigated areas, the trend of the turnover of the Company does not get affected much by the seasonality factor. Additionally, due to storage facilities available and fumigation system (a process wherein the goods are subjected to chemical fumes at a specified temperature to make it insect free) in place for most of the agricultural products, the Company is confident of countering the risks on account of seasonality.

6. **Perishable nature of products:** Exports by the Company include perishable products likes fruits, onions and rice etc. may have an adverse effect on the profitability of the Company, if the shipment gets delayed or there is any other procedural delay

MP

Exports of fruit and perishable products constitute a small portion of the overall turnover of the Company. Further with the help of suitable storage facilities and fumigation system, the shelf life of such commodities can be prolonged.

7. The requirement of working capital has been assessed by Corporation Bank. The said Bank currently has not sanctioned any additional working capital limits to the company nor does it hold any stake in the Company.

MP

The working capital requirement has been assessed by Corporation bank solely based on the historical norms emerging out of the financial statements up to the financial year 2004-05 of the Company along with the future projections / estimates foreseen for ongoing business activity. At present the Company did not seek enhancement in its working capital in addition to the credit sanctions from the bank as mentioned on page 33 of the Prospectus. MP

The proposed public issue is to augment the long term resources of the company for the working capital requirements; any delay in raising the funds from the public issue may have an adverse impact on the performance of the Company. The existing operations of the Company are profitable and the Company shall meet any unforeseen delay in raising the funds through Public Issue by temporarily realigning activities during that period.

10. There could be any delay in the schedule of deployment of funds for the proposed growth plan, may have an adverse impact on business.

MP

MP

The affairs of the company are being managed professionally with a clear-cut demarcation of responsibilities. Hence, there is no likelihood of any conflict of interest in the operations and day-to-day affairs of the company. Further, there is no related business being conducted by the other concerns and there would be no conflict of Interest per-se

12. The Promoter and the Promoter Group currently hold 100% of the present paid up equity capital, which would decrease to 58.79% Post-Issue. Being majority stakeholders, the Promoters and the Promoter group have the ability to exercise significant influence over matters requiring shareholder's approval, as only 41.21% of the diluted post-issue paid up capital is being offered in this Issue, prior to conversion of warrants attached to the preference shares. The shareholders arising out of this Issue may not be in a position to influence any decision taken by the Promoters and the Promoter Group.

13. Pending utilization, the proceeds of the issue will be invested in non-productive assets such as Government Securities and Bank Deposits in short and medium term. This deployment may result in inadequate returns to the Company.

MP

Utilization of proceeds for productive purposes can be achieved over a short period by proper planning of ingredients of working capital for higher returns on funds deployed.

14. Any further equity offerings by the issuer and/or its existing shareholders, or the issue of options under an employee stock option plan, may lead to dilution of the shareholding or affect the market price of the Equity Shares.

MP

An ESOP scheme serves as a motivational value for employees, which in turn contributes towards enhancement of shareholder's value.

15. The success of the Company's business depends on its management team. Loss of any key managerial person can adversely affect its business.

MP

The Company provides a challenging, open and professionally satisfying work environment to its employees. The Company does not foresee any problem in hiring and retaining competent manpower. Besides the promoters themselves being professionals, understand the importance of retaining competent manpower.

16. No alternate means of finance have been planned for the Company's plans other than proposed public offering.

MP

17. Unsecured Loans taken by the company can be recalled by lender at any time.

MP

Unsecured loans taken by the Company are mainly from promoters / directors and relatives of promoters. The loans are repayable on demand. Company is profit making and would be able to repay the same out of the internal accruals with out adversely affecting its operations

18. The Issuer has been recently converted into a Company

MP

The Issuer were a partnership firm 'SAKUMA EXPORTS' till recently, hence have limited regulatory experience in managing corporate disclosure and compliance requirements applicable to widely held companies in India and would have to acclimatize ourselves to the new regulatory environment and build-up in-house expertise and resources for the same.

B. EXTERNAL RISK FACTORS

1. The Company operates in a globally competitive business environment. Growing competition may force it to reduce the prices of its products / services rendered which may reduce its revenue and margins and/or decrease its market share, either of which could have a materially adverse effects on its business, financial condition and results of operations.

MP

The Company has a diversified portfolio of commodities and large number of clientele, giving it the flexibility to switch to profit yielding export opportunities. The Company has since overcome the initial teething problem and is equipped to deal and operate in a globally competitive business environment.

2. Any change in the regulatory environment may have an impact on Issuer's business. Its operations are subjected to approval and / or registration with regulatory and / or government authorities. Any change in the policies may have an impact on its business.

MP

The Company keeps itself abreast of the various developments relating to the regulatory environment and gears itself to comply with such regulatory changes. Further, owing to negative Balance of Payment, Government policies have been favorable and supporting for exports.

3. The performance of the Company may be affected by a number of factors beyond its control including political and economic developments both in India and Worldwide. In addition, these conditions may have an adverse impact on the financial markets in India and may cause the market price of Company's equity shares on stock exchange to decline.

MP

Although, the above risk factor is generic in nature, the Company is aware and would address the same through appropriate risk management strategies as and when such eventuality should arise

4. Any change in policies by the countries, in terms of tariff and non-tariff barriers, from which the Company has business partners and alliances, will have an impact on the profitability.

MP

Company's business activities and business relations are spread over many countries, which would negate any adverse impact.

5. Export realization is subject to exchange rate fluctuation

MP

The Company eliminates foreign exchange risk by instantly tying up back to back export orders with its suppliers. Further immediately on booking the export order, Company sells the expected foreign currency proceeds in forward to their bank to eliminate possibility of any loss on account of exchange fluctuation.

6. Being a global player, Company is dealing in different currencies. Any adverse fluctuations with respect to the exchange rate of US Dollars for Indian Rupees or any other currency is likely to affect the revenues.

MP

The Company is a net foreign exchange earner (after adjustment of cost of import against exports). The Company is presently dealing in U S Dollar only and has a policy of selling the expected foreign exchange in forward to their bank and there by negating the possibility of any loss on exchange fluctuations.

7. Merchant Export activities have become very competitive with many new entrants

MP

The Company's Promoters amongst them have rich experience of over a decade in this industry. The Company expects that it would be in a position to effectively counter competition in view of its scale of operations and established client base.

8. After this Issue, the prices of Issuer's Equity Shares, Preference Shares, Warrants may be highly volatile, or an active trading market for its Equity Shares, Preference Shares, Warrants may not develop. The prices of its Equity Shares, Preference Shares, Warrants on the Stock Exchanges may fluctuate as a result of several factors, including:
 - Volatility in the Indian and Global Securities Markets,
 - The results of operations and performance in terms of market share,
 - Performance of its competitors, the Indian Export Industry and the perception in the market about investments in the Export sector,
 - Performance of the Indian Economy,
 - Changes in the estimates of its performance or recognitions by financial analysts,
 - Significant developments in India's economic liberalization and deregulation policies, and
 - Significant developments in India's fiscal and environmental regulations.

There has been no public market for the Equity Shares of the Company and the prices of the Equity Shares may fluctuate. There can be no assurance that an active trading market for the Equity Shares will develop or be sustained after this Issue or that the prices at which the Equity Shares are sold in this Issue will correspond to the prices at which the Equity Shares will trade in the market subsequent to this Issue.

9. An economic downturn may negatively impair Company's operating results.
10. Political instability in India, United States, Europe, South East and Middle East Asia and other countries where Company's customers are based, can adversely affect the Company's business.
11. Volatility in the foreign exchange rate could adversely affect the cost of the Company's imports (on account of rupee depreciation) and competitiveness of exports (on account of rupee appreciation). Hence, the Company carries a potential foreign exchange risk

MP

Depending on its perception and expectation of the movements in the foreign exchange market, the Company may enter into forward contracts to reduce the exchange risks.

SECTION III INTRODUCTION

SUMMARY

The Industry

India's exports during the financial year April 2004 to March 2005 reached nearly US \$ 80 billion – being valued at Rs. 3570.77 billion (US \$ 79.59 billion), indicating a record growth of 21.72% (24.41% in dollar terms) over the level of Rs. 2933.67 billion (US \$ 63.9 billion) during April-March 2003-04. The growth achieved during the year is substantially higher than the 21.31% export growth in April-March 2003-04 over April-March 2002-03.

The export growth rate target for the year 2004-05 was originally set at 16% (value of US \$ 73.4 billion). The actual growth exceeded by as much as 50%. Despite the robust growth in exports, India's share in the global export market is still under 1%.

With the high growth achieved despite strengthening of the rupee vis-à-vis the US dollar and the overall impact of rise in fuel prices on competitiveness, the exports from India are expected to double its percentage share of world merchandise trade by increasing its exports to US \$ 150 billion by 2009

On the back of robust growth during the year, Ministry of Commerce has revised India's export target for the year 2005-06 upwards to US \$ 92 billion from the US \$ 88 billion target set earlier.

SECTION IV ABOUT SAKUMA EXPORTS LIMITED

INDUSTRY OVERVIEW

Industry Overview:

With Globalisation of markets, role of international trade is on the increase. Trade facilitates meeting the aspiration and demand of consumer world over by making available commodities of different origin throughout the year at reasonable prices. Today by virtue of free movement of goods one can have access to goods produced in different parts of the world.

India's exports during the financial year April 2004 to March 2005 reached nearly US \$ 80 billion – being valued at Rs. 3570.77 billion (US \$ 79.59 billion), indicating a record growth of 21.72% (24.41% in dollar terms) over the level of Rs. 2933.67 billion (US \$ 63.9 billion) during April-March 2003-04. The growth achieved during the year is substantially higher than the 21.31% export growth in April-March 2003-04 over April-March 2002-03. (Source: Ministry of Commerce, DGCI&S)

The export growth rate target for the year 2004-05 was originally set at 16% (value of US \$ 73.4 billion). The actual growth exceeded by as much as 50%. Despite the robust growth in exports, India's share in the global export market is still under 1%.

With the growth achieved despite strengthening of the rupee vis-à-vis the US dollar and the overall impact of rise in fuel prices on competitiveness, the exports from India are expected to double its percentage share of world merchandise trade by increasing its exports to US \$ 150 billion by 2009

On the back of robust growth during the year, Ministry of Commerce has revised India's export target for the year 2005-06 upwards to US \$ 92 billion from the US \$ 88 billion target set earlier.

Government Initiatives:

In view of the Trade deficit and negative balance of payment of India the Government has been laying thrust on Export Promotion. From time to time Government has been coming out with various schemes for export promotion; the company has been availing benefits under few export promotion schemes of Government of India namely DEPB, DFRC, Incremental Growth, Vishesh Krishi Upaj Yojna and Target Plus.

Foreign trade Policy (2004-2009)

A comprehensive Foreign Trade Policy (2004-09) was announced on August 31, 2004. The basic objective of this policy is to double India's share of global merchandise trade by 2009 and to make exports an effective instrument of economic growth and employment generation. The key strategies adopted in the policy to enhance exports include simplification of procedures, reduction in transaction cost, neutralization of incidence of all levies and duties on inputs used for export, facilitating development of India as a global hub for manufacturing, trading and services and identifying and nurturing special focus areas like agriculture, handlooms, handicraft, gems & jewellery and leather, footwear etc. In addition, export promotion schemes like 'Vishesh Krishi Upaj Yojna' and 'Served from India' scheme to accelerate the growth of agriculture and services exports were also announced.

Varied number of measures like simplification of import export license, computerisation, specified time for issuing license, and related operations are undertaken to bring down the transaction cost and time.

Special Economic Zones (SEZs)

With a view to give thrust to exports while at the same time catalyzing greater economic activity and employment in enclaves of export excellence, 36 SEZs have been approved and all the 8 Export Processing Zones have been converted into SEZs. Exports from SEZs during 2003-04 registered a growth of 44 percent in dollar terms as compared to the previous year.

Agri Export Zones (AEZs)

With the primary objective of boosting agricultural exports from India, in March 2001, Government of India announced a policy of setting up of Agri Export Zones (AEZs) across the country. As of now the Central Government, through its various departments, has sanctioned 60 AEZs comprising about 40 agricultural commodities. These AEZs are spread across 20 states in the country.

The objective of setting up AEZs is to converge the efforts made, hitherto, by various central and state government departments for increasing exports of agricultural commodities from India. The concept of Agri Export Zone takes a comprehensive view of a particular produce/ product located in a geographically contiguous area for the purpose of developing and sourcing raw materials, their processing/packaging leading to final exports. The entire effort is centered on a cluster approach of identifying the potential products, geographical region in which these products are grown and adopting an end-to end approach of integrating the entire process right from the stage of production till it reaches the consumption stage.

The 60 AEZs sanctioned by the Government envisaged an investment of Rs. 1,717.95 crores and export of Rs. 11,821.47 crores over a period of 5 years. Against these projections, these AEZs have so far crystallized an investment of Rs. 449.90 crores and exports of Rs. 2768.00 crores over the last three and a half years. For this the company will be leveraging the bond and relationship developed and further enhancing customer satisfaction.

PROCUREMENT PROCESS

The Company is exporting a number of commodities namely Peanuts, Red Split Lentils, De-Oiled Cakes (Soya, Sunflower etc.) Sugar, Onions, Maize, Wheat Flour, Sesame Seeds, Chilli, Rice, Castor Oil, Chick Peas, etc. The procurement process differs from commodity to commodity. Processes involved for procurement of few products are explained below:

Groundnut/Peanuts

Groundnuts in India are grown in the states of Gujarat, Andhra Pradesh, Maharashtra, Karnataka, Orissa and Tamil Nadu. These states are also leading in shelling of groundnuts into peanuts. The company has identified leading brokers in the above-mentioned states through whom the peanuts are procured for exporting. Over a period of time the company has developed a strong network of peanut suppliers who are supplying to it peanuts on regular basis depending upon the season when crops in the respective state matures at most competitive rates backed up with an excellent quality. The company enters into formal contracts with the suppliers specifying the quantity, quality (including size, moisture contents etc.); price; delivery period and the packing material. The rates are fixed on FOR basis for warehouse located at Chennai, Mundra, Kandla, and Mumbai (JNPT). On receipt of the commodity at the warehouse, the quality and quantity are duly checked by a team comprising of company's officials, broker's representative and a representative of clearing agent. The company appoints at the port a clearing agent charged with the responsibility of loading, unloading, storage, stuffing of the containers and shipment as well as compliance with various statutory requirements. The payments for commodity received are released immediately from the registered office on receipt of relevant reports on quality and quantity. The company has developed an effective MIS wherein discrepancy in the quality and quantity is brought to the notice of all concerned for necessary remedial action, if any warranted under the circumstances.

Sugar

The company sourced its sugar primarily from the co-operative sugar mills located in the state of Maharashtra. Initially the company negotiates and finalizes the price and quantity with the concerned sugar mill, in line with the rate fixed by the Sugar Commissioner's Office. Thereafter a release order is obtained from Government of India, followed by the Central Excise Bonds under which the exports take place. The company is required to furnish a bank guarantee for the purpose to the Central Excise department. In the interim the company finalises the shipping company through whom the sugar shall be dispatched to the port of destination. Arrangements are made to ensure that the empty containers of the concerned shipping line are sent to the Sugar Mills. The payment is made by the Bank directly to the Sugar Mill. At the time of release of sugar in containers of the Shipping Company, they are sealed by the Central Excise authorities and cleared under the central excise bond for export from the sugar mill. The containers are directly dispatched to the desired port for loading on board the ship, to be shipped to its final destination overseas.

Onions

Onions are procured through brokers/merchants from Nasik/ Pune. Onions are bagged at the site and transported to company's hired godowns located near the port in Mumbai. At the godown these onions are stuffed into containers and shipped to their final destination. The payment for onions purchased, is made only after receipt of goods in Godown. Onions, being a perishable commodity, steps are taken to ensure that immediately on receipt of the same in godown they are stuffed into containers and shipped. Stuffing of Onions into containers is done with the due care for ventilation to ensure that they are not spoiled during the shipment period.

Wheat Flour.

Before procuring wheat, the company negotiates primarily with the flourmills located close to the port of dispatch various important issues like pricing, quality control and the timings. Thereafter, it proceeds ahead with the lifting off wheat from the Food Corporation of India, for which a Bank Guarantee has to be given to them. The wheat delivered to the flour mill is processed by the concerned flour mill into flour and thereafter packed, stuffed and sealed in containers under the supervision of central excise and dispatched to the port for shipment to the final destination. The company makes the payment after the dispatch of the goods from the mill. Samples of the material dispatch from the mill are drawn and sent to Geo-Chem or SGS, the surveyors of International repute, for testing to ensure that the flour meets technical specification as demanded by the clients.

The procurement of other items being exported are not elaborated for the fear of repetition.
